SPECKLE PARK SALE

Bred for Quality & Performance

40 Purebred Speckle Park Bulls

Friday 6th September, 2024 - 1pm

'Mount Mill', Coolah Creek Rd, Coolah NSW

Bid live on AuctionsPlus
www.minnamurra.com.au

WELCOME

Welcome to Minnamurra's 9th Speckle Park Sale. We cancelled last year's sale so we could use all our 2021 bulls in our commercial herds, but the upside is that we now have roughly 2,000 Speckle cross calves to grow out and the kill data to asses, allowing us to make informed decisions to guide our stud breeding program. With over 100 bulls being produced each year now, we will have plenty of stock going forward to supply both our annual bull sale and our commercial herds.

Crossbreeding Success. The flexibility of Speckle crossbreeds was highlighted again for us this year when dry conditions and false predictions of another drought prompted us to move around 1500 Speckle cross weaners into custom feeding. Needless to say, they weren't in ideal condition when inducted, but we managed to turn a good profit through their good conversion rates and high scoring carcasses. See the pages at the back of this catalogue for more details. Our run of wins also extended in the RNA Paddock to Plate trials, taking out the reserve champion carcasse in 2023.

Our Breeding Program. We have begun to class a lot deeper into our female herd now, culling 160 heifers and cows in the last 18 months, as we move beyond our Canadian genetic base to ensure our bulls are ideally suited to our commercial industry. On the sire side, we couldn't be happier with the way Nosey Jack, JAD N13, has developed into the complete bull. Of the 63 calves born to him so far, from 63 different dams, the average birthweight across the sample is 37 kg. Combined with their low birthweights, the calves have plenty of length and excellent growth rates, (200-, 400- & 600-day EBVs averages in the top 20% of the breed), with an average IMF of 6.7%. We have 11 Nosey Jack sons in this year's draft. Another bull that impresses us with his birthweights and good growth rate is Nate, JSN N08, with 5 sons in this sale. The importance of putting live calves on the ground unattended cannot be underestimated, so we are also looking forward to seeing this year's drop from Paxton (MPC P115), which we re-purchased in the Southern Success sale in 2022 because of his proven low birthweights and performance figures. We currently have 67 heifers in calf to Paxton, due to calve shortly.

Lot Videos. Videos of all our lots are up on our website now, or accessible via the QR code on the back cover. There will be audio in real time on AuctionsPLUS, so you can bid live if you are unable to make it to Coolah this year.

Transporting your bulls. Please note our freight offer for interstate buyers, as well as free local deliveries within 150km of Mount Mill.

Thank you for your support and we wish you well with your bidding.

SALE INFORMATION

GETTING THERE

"Mount Mill" is situated 10km from Coolah, NSW. See page 53 for map & accommodation details. Sale starts at 1pm.

PHONE BIDDING

Contact Agents 24 hours prior to sale.

SELLING SYSTEM AND BUYER'S REGISTRATION

All lots will be sold subject to the usual terms and conditions governing auction sales. Intending purchasers should obtain a Buyer's Number and registration slip available from the selling agents prior to the sale.

THE MINNAMURRA GUARANTEE

Any Minnamurra Speckle Park bull that proves to be structurally unsound, infertile or incapable of service is guaranteed for up to 6 months from date of sale.

Under these circumstances Minnamurra will replace the bull with a satisfactory substitute if available or issue a refund equal to the purchase price, less the salvage value.

The guarantee covers the purchase value of the bull, without interest, cost and damages. The guarantee shall apply providing the bull's incapacity is not caused by injury or disease contracted since leaving the sale. A veterinary certificate must be supplied by the purchaser on request.

If any bull that is purchased does not possess a reasonable fertility, although not totally infertile, any dispute that may arise will be settled by an arbitrator appointed by the auctioneers and must be lodged within 6 calendar months from date of sale.

We recommend that all purchasers discuss injury insurance of their bulls at the sale with Elders Ltd or their Agent. This guarantee is in addition to the normal terms and conditions governing auction sales.

HEALTH TREATMENTS

All the sale bulls have been tested negative to Pestivirus and have been vaccinated for ticks and Vibriosis prior to sale, allowing access to Qld.

We recommend annual boosters be given to all bulls. All of our bulls receive 5-in-1 vaccinations at three-months of age, six weeks later and a booster as a yearling. All animals are drenched at weaning and periodically according to worm counts. Minnamurra has J Bas 7 Johnes status.

VET CHECK

All Minnamurra bulls were examined by Dr Chris Hallet prior to sale day which included palpation of the sexual anatomy, semen testing, sperm morphology and pestivirus DNA testing, as well as physical examination of their structure and feet. Some of the autumn drop bulls were used in a 6 week joining period over commercial heifers in Nov/Dec last year.

Stress, transport and nutritional changes can affect a bull's semen cycle for up to 70 days. If you move your bull to a completely different environment, we strongly recommend you do your own fertility examination prior to use. Similar precautions should be exercised prior to drawing a bull.

FREIGHT

All bulls must be transported from Mount Mill by sundown Sunday. **Minnamurra will personally deliver bulls to buyers whose properties lie within a 150km radius of Mount Mill free of charge.** Formal possession, risk and expenses passes to the buyer at the fall of the hammer. Minnamurra can arrange transport on sale day for you.

For interstate buyers, Minnamurra will arrange and cover freight costs as far as the Qld, Vic or SA border.

FEED REGIME

All the bulls were reared on oat pastures with a hay feeder in the paddock.

SCAN DATA & EBV's

All bulls were scanned on 24th May, and their data submitted to Breedplan for EBV determination. They will be scanned again two weeks prior to the sale and the raw data will be available on the supplementary sheet on sale day, including structural assessment data on each bull.

NB: EBVs in the top 10% or better of the Speckle breed are highlighted with green shading; EBVs above the breed average (B.Av) are highlighted in red.

GENETIC TESTING

All purebred bulls in this catalogue have been DNA verified for parentage except for two bulls. (These have been marked in the catalogue as unregistered and are being sold as commercial bulls only). All purebred animals have been tested for poll, coat and myostatin. Bulls have also been tested for Leptin (tenderness). Results are recorded against each animal as follows:

DNA TEST DATA:

Key codes to the DNA tests shown against each lot in the catalogue are as follows:

P:C	Carries one horn gene
P:F	Free of the horn gene
P:-	Not tested
R:C	Carries one red gene
R:F	Free of the red gene
R:N	No result returned
M:C	Carries one myostatin gene
M:F	Free of the myostatin gene
L: C/C	Unmutated leptin genes
L: C/T	One mutated leptin gene
L: T/T	Two mutated leptin genes

SEMEN RIGHTS

Minnamurra retains the semen rights for in-herd use only in a number of bulls in this catalogue, as noted under the lot number. If the right to collect semen is exercised, Minnamurra will consult with the new owner of the bull to arrange a convenient time for collection, with the cost of collection being paid for by Minnamurra.

PRE SALE INSPECTION

Bulls will be available for inspection from 8am on the morning of the sale. They will be moved into the sale arena and yarded at 11am. Inspections are welcome at other times by arrangement.

SUPPLEMENTARY SHEET

Updated weights, scans or any other new or relevant information will be available on sale day.

CATERING

Morning tea and lunch will be provided at the sale.

MOBILE RECEPTION

Optus service is good, but Telstra service is patchy. Wi-Fi will be available in the sales arena, so Telstra phones can be used if Wi-Fi calling is activated.

NO VERBAL INSTRUCTIONS

Please fill out the buyer's instruction sheet available on sale day from the office.

AGENT'S REBATE

A 2% rebate will be paid to all settling agents who accompany their clients on sale day or who introduce their clients in writing by fax or email at least 24 hours prior to the sale to Elders Tamworth (contacts@elders.com.au).

GST

Bulls will be sold GST exclusive i.e. If the bull is knocked down for \$5,000, you will be charged \$5,500.

The sale is interfaced with AuctionsPlus and will be conducted live on line in real time. For those not able to attend the sale, new users must register 24 hours prior to the sale in order to bid. Full instructions are on the AuctionsPlus website. Note that transport must be organised sale day.

PRE-REGISTRATION

We are encouraging all buyers to please register online before sale day by scanning the QR code below. Please collect your bidder number from the Elders sale office at Mount Mill on sale day prior to Auction.

Note that pre-registrations will close the day before the sale at 5pm - 05/09/2024. However, registrations will still be available on sale day.

SETTLING YOUR BULLS IN

We strongly recommend that you have some other cattle in the yards to welcome your new addition. All our bulls have been running in their contemporary groups since birth, so it can be quite distressing for them to be left in a yard by themselves after being trucked. We can assure you that our bulls are handled extensively with low stress practices prior to sale - everything from vaccinations, being washed 3 times (photos, videos and pre-sale), fertility testing, scanning, branding, etc. Also, when cataloguing, we put each bull by himself to ensure his temperament is sound. Despite this we still find that the odd bull will fire up when he reaches his new home. There is a subtle difference between a bull that is frightened and trying to defend himself, and one that is straight out aggressive. Despite our best efforts to deliver you a nice quite bull, we still have the odd one that doesn't want to play the game. If this does happen, we are truly sorry, but please don't hesitate to get in touch with us so we can resolve the problem.

Please bring this Catalogue to the Sale

DISCLAIMER: Minnamurra Pastoral Company, the selling agents, officers, agents and employees, while exercising due care, provide all information without responsibility and do not warrant its accuracy. They also accept no responsibility for accidents that occur on or about the venue. You attend the venue and the sale at your own risk.

REFERENCE SIRES:

JSF REDNECK WHISKEY 4B

Whiskey was sashed Junior Champion at Agribition in 2015, where we purchased a major share in him with Johner Stock Farm in Canada, and are delighted with his progeny. He is putting a beautiful head and shoulders on all his calves, while under the skin the marbling and eye muscle development is extraordinary. This bull is doing great things for the breed.

RIVER HILL CRUSADER 025C

Crusader was the standout bull at the 2016 Summit 3 Sale in Canada and the highest priced Speckle bull at the time. He is a well-muscled and well covered bull with great carcass attributes. His bulls have plenty of length and he is breeding good females.

DOUBLE S JSF RAWHIDE 260D

One of the newer sires in the Minnamurra stable, Rawhide is maturing into great bull, similar to Whiskey. His calves that have dropped so far are low birth weight and easy out. We are very excited about this bull.

JOHNER STOCK FARM UNMARKED 2D

Unmarked is a real meat machine and is constantly producing top class females and bulls with the same quiet temperament. His owner David Johner, Johner Stock Farms Canada, describes him as the most complete bull he has seen in the breed. We have used him extensively over our white females the last two years to introduce more speckled coats into our herd.

JAD NOSEY JACK N13

Nosey Jack was bought as a cover bull, but we couldn't be happier with the way he has grown out into a big, large framed Lacerta bull, with length, depth and a great temperament. He is throwing low birthweight calves, bulls and heifers alike. A very handy addition to our stable of sires that we intend to use extensively. This is the first time we have offered his sons for sale.

Trojan T79 has the ability to really shift the Speckle Park breed. A curve bending sire who scanned at the top of his contemporary group for all traits. It is rare to see the genetic combination of carcass, maternal, temperament and soundness in the one package. MPC retains the right to collect 200 straws of semen at a future date.

LOT 7 MINNAMURRA TEE-BALL T108

MPC – SUCCESS FROM CROSSBREEDING

As our markets change, develop, and expand MSA grading is paramount for a producer's success. Recently it is common to see MSA graded cows commanding 100 cents higher per kilo than non-grading bodies. It is a similar story across all types.

Minnamurra Pastoral Company has a proven long-term history of supplying quality cattle to both feedlots and abattoirs. The use of Minnamurra Speckle Park bulls over a wide variety of different breeding cows has proved successful over many different seasons and abattoirs.

As an exercise, I have looked back over Minnamurra's kill data from over 500 Speckle Park/crossbred cull cows

in both wet and dry seasons, off grass only, and from different abattoirs. Cows and cull females are a huge part of a producer's bottom line, a fact often overlooked by the media. The average across this large sample of slaughter cows was 12.7mm fat cover, with 73% grading MSA, to an average index of 53.1. This week they killed 149 cull Speckle Park cross cows that averaged 314kg HSCW 19mm with 93% (140/149) grading MSA and great premiums. The ability to increase carcass grading quality without greatly lifting fat cover has been highly beneficial to these results.

Minnamurra Speckle Park bulls have consistently produced crossbred calves of better carcass quality, highlighting their underlying genetic merit. During dry conditions Minnamurra have been able to feed with confidence large numbers of lesser quality, out of spec types into a profitable outcome and this offers them great flexibility in management. The Speckle cross's well-documented foraging ability in dry paddocks

during tough conditions ensures that they hold their condition longer and so contribute to their overall success. I highly recommend Minnamurra Speckle Park Bulls to add value to your herd.

Andrew Hosken
Livestock Consultant

A CROSSBREEDING CASE STUDY

“Over the last 12 months we had to custom feed over 1500 head in feedlots due to dry conditions impacting our ability to finish on grass and alarmist forecasts in the media. A good example of the flexibility that Speckle Park crossbreeding affords us is a recent kill in July of a generic load of Speckle cross/Qld composite yearlings. These 130 cattle went in at a less than desirable weight (anything from 250kg to 580kg) in a large mixed pen during the cold winter months and exited after 103 days at a very respectable 1.96 kg ADG. The carcasses were impressive, given that they were from very ordinary cattle (on left), with 95% meeting MSA grading. The results are shown below”

BETTER CARCASSES • BETTER YIELDS • FOR BETTER PROFITS

Using Minnamurra Speckle Park bulls in your cross-breeding program leads to proven results:

- Improved carcass quality
- Improved MSA grading
- Improved performance
- Improved profits from your herd

MPC has been consistent in winning national carcass competitions over the past 8 years using our Minnamurra Speckle bulls over Angus cows, as shown on the opposite page.

We recently fed 600 milk and 2 tooth light weight Speckle/Angus cross steers for 150 days when the season moved against us. These pictures and the table below show the results:

Kill Date	No. Head	Averages across the Kill			
		Carcass Weight Kg	Fat Cover mm	MSA Marbling	MSA Index
16-Apr	108	364	23	3.7	64.7
15-May	145	387	23	2.6	63.3
28-May	157	340	23	2.8	63.5

"Wingham Beef Exports have killed cattle from Minnamurra Pastoral Company for many years. The quality of carcass has always proven of a high standard. Over the last few years we have killed a higher number of Speckle Park cross cattle than previously, both young and old grass fed and also longer grain fed. The Minnamurra cattle have proven to have higher than expected marbling, with grain fed cattle up to MSA 8 and many others 3-4 plus. Cows and young cattle have consistently met high MSA grading. We are always happy to kill Minnamurra Speckle Park progeny."

Stephen Moy.
Livestock Manager
Wingham Beef Exports.
