

# SUPPLEMENTARY SHEET

SPRING SALE - FRIDAY 6<sup>th</sup> SEPTEMBER 2024

Minnamurra  
Speckle Park

- ) All bulls have been vaccinated for Vibriosis. Due to an error with the expiry date of the live vaccine, we were unable to vaccinate the bulls for ticks prior to the sale. However, any purchaser who requires tick vaccination can let us know, and we will vaccinate your bull and hold them at Mount Mill until they are ready to travel to Queensland.
- ) Minnamurra will personally deliver bulls to buyers whose properties lie within a 150km radius of Mount Mill free of charge. For interstate buyers, Minnamurra will arrange and cover freight costs as far as the Qld, Vic or SA border.
- ) Can't make it to the sale? Bid online on AuctionsPlus. Videos and catalogues featuring each bull are available on our website [www.minnamurra.com.au](http://www.minnamurra.com.au), or scan this QR code:
- ) To avoid congestion on sale day, please pre-register for the sale by the day before using the link on our webpage, then pick up a bid card from the Elders' desk when you arrive.
- ) All sale animals were re-scanned and structurally assessed by Roger Evans of Bovine Scanning Services on **Wednesday 28<sup>th</sup> August 2024** and the latest results appear in the tables below.

## TWO-YEAR OLD 'T' BULL SCANS

Lot No.	NAME	Date of Birth	Live Weight (kg)	Scrotal (cm)	EMA (cm)	P8 Fat (mm)	Rib Fat (mm)	IMF (%)

## BRINGING YOUR NEW BULLS HOME

We strongly recommend that you have some other cattle in the yards to welcome your new bulls to avoid stressing them. Bulls will take some time to adjust to a new location and to new grazing conditions. The impact of temperature, humidity and unfamiliar pastures/feeds all contribute to reduce feed intake and lead to weight loss and to fertility depression. As part of the planning around bull purchases, it is worth considering how nutrition can be maintained while bulls acclimatise to new locations. In some cases, it may be providing access to good quality forage along with better pastures for a few weeks while bulls adjust. It may also require re-thinking paddocks to help bulls adjust to the temperatures of a new location. It is worth recognising that the stresses of sale and transport, along with adjusting to a new location will take some time for bulls to recover from. By planning to minimise the impacts these have, the period of time where bulls may be less fertile can be potentially reduced.

Due to extended wet conditions the bulls hoofs are soft and may be foot sore for a short period when transferred to firmer ground.

**MINNAMURRA SPECKLES**
